

# TORQUE CALIBRATION EQUIPMENT

- Use to test all types of torque wrenches in all types of settings where full scale calibration is needed or where a quick Pass/Fail check is required.
- Accuracy of +/- 1% of indicated value in both clockwise and counter clockwise directions.
- Broad accuracy range extends from 10% to 100% of full scale.
- Three units of measure are available ft-lb, in-lb, and Nm.
- Three operating modes: Track Mode, Peak Hold and First Peak (for use with Click-style Torque wrenches).
- Fast sampling rate helps maintain high accuracy during torque applications.
- Each tester is built with a male square drive and also comes supplied with a female-to-female square drive adapter.
- Powered by a standard 9V battery, providing up to 50 hours run time.
- Testers meet or exceed requirements set forth in ASME B107.29
- NIST traceable calibration certificate supplied with each tester.
- Optional all-steel stand (J6470S) provides a strong support with minimal footprint.

Floor Stand Accessory

### FLOOR STAND (ACCESSORY)

- Floor stand for Proto<sup>®</sup> Torque Testing systems makes installation quick and easy.
- All steel construction.
- Mounting holes predrilled to match Proto<sup>®</sup> test systems.
- Floor mount holes are pre-drilled for securing to the floor.
- Small footprint for space saving economy.
- Durable powder coated paint.
